

Client Project - MERN Stack: Personal Finance Tracker

Deadline: May 27, 2025

Project Description:

Create a full-stack personal finance tracker using the MERN stack (MongoDB, Express.js, React.js, Node.js). This app helps users track income, expenses, and generate monthly summaries.

Requirements:

1. User Authentication: Register and login using JWT and bcrypt.
2. Dashboard: View income, expenses, balance, and recent transactions.
3. Add Transactions: Form to add income or expense with category, amount, and date.
4. Edit/Delete Transactions: Allow editing or deleting existing records.
5. Filter/Search: Filter transactions by category, date, or search by keyword.
6. Charts: Show monthly spending and income trends using a chart library.
7. Profile Management: User can update profile picture and basic info.
8. Responsive Design: Make sure the app works well on both desktop and mobile.
9. Deployment: Host frontend on Vercel and backend on Render or Railway.
10. Bonus: Export transactions to CSV or PDF (optional).
